understood by considering multiple perspectives and that these varying perspectives provide the clearest accounting of the causes of these disorders as well as the best possible treatments.

This custom edition is published specifically for Swinburne University.

Case Studies in Abnormal Psychology presents a broad range of cases drawn from the clinical experience of authors Kenneth N. Levy, Kristen M. Kelly, and William J. Ray to take readers beyond theory into real-life situations. The authors take a holistic approach by including multiple perspectives and considerations, apart from those of just the patient. Each chapter follows a consistent format: Presenting Problems and Client Description; Diagnosis and Case Formulation; Course of Treatment; Outcome and Prognosis/Treatment Follow-up; and Discussion Questions. Providing empirically supported treatments and long-term follow-up in many case studies gives students a deeper understanding of each psychopathology and the effects of treatment over time.

Balancing biological, psychological, social, and cultural approaches, this book's ground-breaking integrative approach is the most modern, scientifically valid method for studying abnormal psychology. Updated with leading-edge research findings, the eighth edition draws on the expertise of David H. Barlow, V. Mark Durand, and Stefan G. Hofmann, three internationally recognized experts in clinical psychology. In *ABNORMAL PSYCHOLOGY: AN INTEGRATIVE APPROACH*, the authors successfully blend sophisticated research with an accessible, engaging writing style. They go beyond simply describing different schools of thought on psychological disorders, exploring the interactions of the
