Global Aquaculture Feed Market Research Report 2019

The global aquaculture feed market attained a volume of 55 million tons in 2019 driven by the rising mass production of fish and growing consumption of seafood. Aided by the growing adoption of sustainable farming practices, the market is expected to witness a further growth in the forecast period of 2020-2025, growing at a CAGR of 10.4%.

Global Aquaculture Feed Market Size, Share, Analysis, ...

With the presence of several major players, the global aquaculture feed market is fragmented. Technavio ' s robust vendor analysis is designed to help clients in improving their market positions, and in line with this, this report provides a detailed analysis of several leading aquaculture feed manufacturers, which include Alltech Inc., Cargill Inc., Charoen Pokphand Group Co. Ltd., Land O'Lakes Inc., and Nutreco NV.

Global Aquaculture Feed Market 2019-2023

Advancements in pharmaceuticals and biologics will continue to impact global market growth through 2025. The global market for aquaculture feed and pharmaceuticals is likely to be influenced by innovations and research in biologics and pharmaceuticals in the coming years. Needless to say, the pharmaceutical and biologics segment will dominate the global aquaculture feed and pharmaceutical market in terms of value during the eight year period 2017 – 2025.

Aquaculture Feed and Pharmaceutical Market: Global, ...

The global aquafeed market size was valued at USD 63.8 billion in 2019 and is expected to expand at a compound annual growth rate (CAGR) of 4.3% from 2020 to 2027. Growing direct human consumption of seafood and increasing demand for aqua products are projected to fuel the industry growth over the forecast period.

Global Aquafeed Market Size | Industry Report, 2020-2027

The Global Aquafeed and Aquaculture Additives market research report includes in-depth coverage of the industry with estimates & forecast in terms of volume in Kilotons & revenue in USD Million from 2015 to 2026 for the following segments: Aquafeed Market, By End-use

Aquafeed Market Growth Statistics 2020-2026 | Trends Report

The aquafeed market is projected to register a CAGR of 2.3% over the forecast period. The growing demand for fish has increased export-oriented aquaculture and increased the adoption of 'Scientific Aquaculture Management Practices' (SAMP). As a result, fish farming is anticipated to grow, presenting an opportunity for the aquafeed market to grow.

Aqua Feed Market - Growth, Trends, and Forecast (2020 - 2025)

Global Aquaculture Feed Market 2017 Industry Research Report. Report Details. Table of Content. Inquiry Before Buying. Request Sample. In this report, the global Aquaculture Feed market is valued at USD XX million in 2016 and is expected to reach USD XX million by the end of 2022, growing at a CAGR of XX% between 2016 and 2022.

Global Aquaculture Feed Market 2017 Industry Research Report

Global Aquaculture Market Overview: Aquaculture Market size was valued at \$169 billion in 2015, and is anticipated to grow at a CAGR of 5.3% to reach \$242 billion by 2022. The market encompasses environment type, fish type, and geographical division.

Aquaculture Market Size, Trends & Growth | Report Analysis, ...

The different methods of marine aquaculture include sea ranching, intensive aquaculture, and rack & line farming. Furthermore, advancements in feed systems are also growing to meet the rising demand for the inclusion of nutrients at an optimum level in the diets of aquatic animals.

Aquaculture Market | Overview, Analysis, Industry Outlook, ...

Rising demand for fish amidst growing concern about the sustainability of global capture fisheries will contribute to the need for intensification in the aquaculture industry, necessitating the use of additional aquaculture supplies and equipment. This report covers aquaculture feed, equipment, and chemical demand by Product, Market, and Region.

Global Aquaculture: Feed, Equipment, & Chemicals

The global aquaculture market is expected to reach a market value of USD 274.8 billion by the end of 2025. Rising fishing activities globally has led to the diminution of the aquatic ecosystem. Thus, aquaculture as an auxiliary to natural fishing is foreseeing a robust growth.

Aquaculture Market Size and Share Analysis (2019-2025)

This study presents historical demand data (2007, 2012, and 2017) and forecasts for 2022 by region, product – aquafeed, equipment (habitats, pumps, filters, and meters) and chemicals (water treatment chemicals, aquafeed supplements, pharmaceuticals, and fertilizers) – and market (hatcheries, intensive grow-out aquaculture, and extensive grow-out aquaculture). The study also evaluates ...

The global Aquaculture Feed market was valued at million US\$ in 2018 and will reach million US\$ by the end of 2025, growing at a CAGR of during ...

The 2020 edition of The State of World Fisheries and Aquaculture has a particular focus on sustainability. This reflects a number of specific considerations. First, 2020 marks the twenty-fifth anniversary of the Code of Conduct for Responsible Fisheries (the Code). Second, several Sustainable Development Goal indicators mature in 2020. Third, FAO hosted the International Symposium on Fisheries Sustainability in late 2019, and fourth, 2020 sees the finalization of specific FAO guidelines on sustainable aquaculture growth, and on social sustainability along value chains. While Part 1 retains the format of previous editions, the structure of the rest of the publication has been revised. Part 2 opens with a special section marking the twenty fifth anniversary of the Code. It also focuses on issues coming to the fore, in particular, those related to Sustainable Development Goal 14 and its indicators for which FAO is the "custodian" agency. In addition, Part 2 covers various aspects of fisheries and aquaculture sustainability. The topics discussed range widely, from data and information systems to ocean pollution, product legality, user rights and climate change adaptation. Part 3 now forms the final part of the publication, covering projections and emerging issues such as new technologies and aquaculture biosecurity. It concludes by outlining steps towards a new vision for capture fisheries. The State of World Fisheries and Aquaculture aims to provide objective, reliable and up-to-date information to a wide audience – policymakers, managers, scientists, stakeholders and indeed everyone interested in the fisheries and aquaculture sector.

Tropical Mariculture takes an in-depth look at developmental activities in a growing industry striving towards sustainability and environmental integrity. All of the contributors to this book have considerable experience and expertise in the field of tropical mariculture, and this is the first book to bring expert contributions together. The topics covered are wide and varied, ranging from general issues such as the impact of mariculture on coastal ecosystems to genetic improvement of cultured marine species, as well as the specifics of breeding selected marine species of current importance, such as groupers and sea bass. Significant coverage is also given to the problems of larval rearing in inland aquaculture as well as the demands of water- and land-based resources in a tropical environment. This book will be essential for everyone working in and researching tropical mariculture. Key Features * Looks at developmental activities in tropical mariculture * All of the contributors are experts in the field * Covers specific breeding problems and larval rearing * Studies the environmental impact of inland aquacultural activities * Provides detailed examples of cultivated species in the tropics * Compiles mariculture strategies and discusses example species * First book to give an overview of tropical mariculture

Global Perspectives on Astaxanthin: From Industrial Production to Food, Health, and Pharmaceutical Applications explores the range of practical applications for this molecule, focusing on nutraceutical, pharmaceutical and cosmeceutical products, along with food and feed. This volume brings together the most relevant research, background and future thinking on astaxanthin, focusing on its health benefits. Chapters cover phytopharmaceuticals, industrial production, feeds, downstream processing, regulations, products, color, pigment, cosmetics, bioactive compounds, relationships to other carotenoids, and skin care. The detailed information on its production, processing, utilization and future applications will be of particular use to academic and industry researchers in pharmaceutical sciences, pharmacology and nutrition. Provides detailed information on astaxanthin, including its production, processing, utilization and future applications Includes discussion on the commercial analysis procedure Offers critical analysis on current and potential applications of astaxanthin as contributed by 121 authors from 22 countries in academia, research institutes and industries

This 2014–2015 Global Food Policy Report is the fourth in an annual series that provides a comprehensive overview of major food policy developments and events. In this report, distinguished researchers, policymakers, and practitioners review what happened in food policy in 2014 at the global, regional, and national levels, and—supported by the latest knowledge and research—explain why. This year ' s report is the first to also look forward a year, offering analysis of the potential opportunities and challenges that we will face in achieving food and nutrition security in 2015.

Aquaculture, the farming of aquatic animals and plants, and other seafood businesses continue to grow rapidly around the world. However, many of these businesses fail due to the lack of sufficient attention to marketing. The Seafood and Aquaculture Marketing Handbook provides the reader with a comprehensive, yet user-friendly presentation of key concepts and tools necessary for aquaculture and seafood businesses to evaluate and adapt to changing market conditions. Markets for aquaculture and seafood products are diverse, dynamic, and complex. The Seafood and Aquaculture Marketing Handbook presents fundamental principles of marketing, specific discussion of aquaculture and seafood market channels and supply chains from around the world, and builds towards a step-by-step approach to strategic market planning for successful aquaculture and seafood businesses. This book is an essential reference for all aquaculture and seafood businesses as well as students of aquaculture. The volume contains a series of synopses of specific markets, an extensive annotated bibliography, and webiography for additional sources of information. Written by authors with vast experience in international marketing of aquaculture and seafood products, this volume is a valuable source of guidance for those seeking to identify profitable markets for their aquaculture and seafood products.

Global Agricultural Trade and Developing Countries presents research findings based on a series of commodity studies of significant economic importance to developing countries. The book sets the stage with background chapters and investigations of cross-cutting issues. It then describes trade and domestic policy regimes affecting agricultural and food markets, and assesses the resulting patterns of production and trade. The book continues with an analysis of product standards and costs of compliance and their effects on agricultural and food trade. The book also investigates the impact of preferences given to selected countries and their effectiveness, then reviews the evidence on the attempts to decouple agricultural support from agricultural output. The last background chapter explores the robustness of the global gains of multilateral agricultural and food trade liberalization. Given this context, the book presents detailed commodity studies for coffee, cotton, dairy, fruits and vegetables, groundnuts, rice, seafood products, sugar, and wheat. These markets feature distorted policy regimes among industrial or middle-income countries. The studies analyze current policy regimes in key producing and consuming countries, document the magnitude of these distortions and estimate the distributional impacts - winners and losers - of trade and domestic policy reforms. By bringing the key issues and findings together in one place, Global Agricultural Trade and Developing Countries aids policy makers and researchers, both in their approach to global negotiations and in evaluating their domestic policies on agriculture. The book also complements the recently published Agriculture and the WTO, which focuses primarily on the agricultural issues within the context of the WTO negotiations.

This book examines how the adaptability and innovation of small-scale aquaculture farmers have been crucial to success in the region. It describes the relationship between aquaculture development in Asia to natural systems, social conditions and economics.

The commercial aquaculture feed industry in Egypt is growing at a rapid rate. As a result, the number of fish feed mills has increased from just 5 mills producing about 20,000 t per year in 1999, to over 60 mills with a current production estimate of 800,000–1,000,000 t/year. The performance of the aquafeed industry in Egypt is not well understood, as the value chain structure has not yet been mapped. This study aims to assess the status of the fish feed sector in Egypt, with an emphasis on: mapping and understanding fish feed value chains, describing the main actors and stakeholders within the chain, assessing value chain performance, identifying major strengths and weakness of the sector, and suggesting appropriate actions, management and development strategies.
