User Requirement

Specifications also known as URS is a document, which describe the basic requirement of any Equipment, Instrument, System or Facility in terms of Make, Model, capacity, Process, Control System and other cGMP requirements. Generally URS is prepared by the Person from the user department. After preparation of the URS it will be reviewed by user department, engineering department, Quality Assurance.

How to Make User Requirement Specifications (URS)

User requirements are

Where To Download User Requirements Template

Typically written when discussing the use cases for a project. The requirements definition is done with the customer or product managers that know how the embedded system will be used by the user. Many user requirements deal with how a user will interact with a system and what that user expects.

[User Requirement - an overview | ScienceDirect Topics](#)

User Requirements Specification (URS) Defined. The URS is originated by the end user extrapolating requirements directly from the production processes. These high end user

Where To Download User Requirements Template

requirements are then passed to engineering who are tasked with turning them into a complete procurement package.
